

ABOUT US

Role-playing Game or commonly abbreviated as RPG is a game where we will 'become' the character itself, playing in a story in a game designed in such a way that we will not get bored. , unfortunately it became increasingly clear that the players wanted a game that resonated with their childhood memories . Actions from the developer made the game too easy to beat, gradually making old and even newer players stop playing. NinjaNFT was created with the mission of bridging new and old fans of RPGs, NinjaNFT on Binance Smart Chain is a blockchain-based online game where you can collect, trade, and even fight against NPCs or other players to become the best.

NinjaNFT is not just a game for traditional blockchain users , but a way to introduce blockchain to gamers . With NinjaNFT , players can own and monetize their gaming experiences on the Binance Smart Chain using FPokeCoin , the platform's utility token . The In - game NFTs in NinjaNFT is not the usual " Collectible art " NFTs common in Crypto today . Instead , they are usable and functional NFTs that can be inserted into the NinjaNFT Game Framework

Key Game Features

NinjaNFT is structured as an open-world RPG game, where after acquiring NinjaCoins, player will be able to experiment with the platform, use ingame assets (NFTs) available in the form of Character and other in-game items, perform daily activities, and participate in community events. BSC Foundation will help bring functionality to the game assets associated with the game in concurrence with the community.

Market Place

One of the game's main features is a virtual marketplace where players can buy and sell their Ninja and other in-game items.

Progression System

NinjaNFT will have a dynamic progression system that rewards players. Players will progress through the game by completing the story, battling players, and other activities. In addition, Ninja Evolution will be a game mechanic that allows trainers to get stronger and more advanced ninja by trading in their compatible Ninja NFT + NinjaCoins after certain conditions are met.

Token Allocation

- Token Sale: These tokens will be reserved for a Token Sale. 80% locked for 1.5 years.
- Platform Rewards and Ecosystem: These tokens will be used to incentivize those players who earn tokens by participating in competitions and other activities in the game. 60% locked for 2.5 years (unlocked monthly)
- Team and Advisors: These tokens are allocated to founding and nonfounding members of NinjaNFT on BSC. 100% locked for 1.5 years (unlocked each trimester).
- Reserve Fund: These tokens are allocated to future funding of the project. Locked

Transaction Fees

Every transaction will involve a 3% fee. Funds obtained via transaction fees will be locked up for up to six months and then distributed to Reserve and Platform Rewards. These tokens will be used by the Game and Governance Community to maintain and expand the NinjaNFT on the BSC ecosystem.

The transaction fee will be split in the following way:

- Platform Rewards and Ecosystem: 83.3%
- Reserve Fund: 16.7%
